

5th Grade Science

3rd 9 weeks Standards/Objectives

LS4.1 Analyze and interpret data from fossils to describe types of organisms and their environments that existed long ago. Compare similarities and differences of those to living organisms and their environments. Recognize that most kinds of animals (and plants) that once lived on Earth are now extinct.

ESS1.7 Use evidence from the presence and location of fossils to determine the order in which rock strata were formed

ESS1.4 Explain the cause and effect relationship between the positions of the Sun, Earth and Moon resulting in eclipses, position of constellations, and appearance of the moon

ESS 1.5 Relate the tilt of the Earth axis, as it revolves around the sun, to the varying intensities of sunlight at different latitudes.

ESS 1.1 Explain the differences in the apparent brightness of the Sun compared to other stars is due to their relative distances from the Earth

ESS1.4 Explain the cause and effect relationship between the positions of the Sun, Earth and Moon resulting in eclipses, position of constellations, and appearance of the moon
